

NAALAIYA THIRAN - REAL TIME COMMUNICATION SYSTEM FOR SPECIALLY ABLED POWERED BY AI

WEEK 6 – REPORT

Activity – 3.3

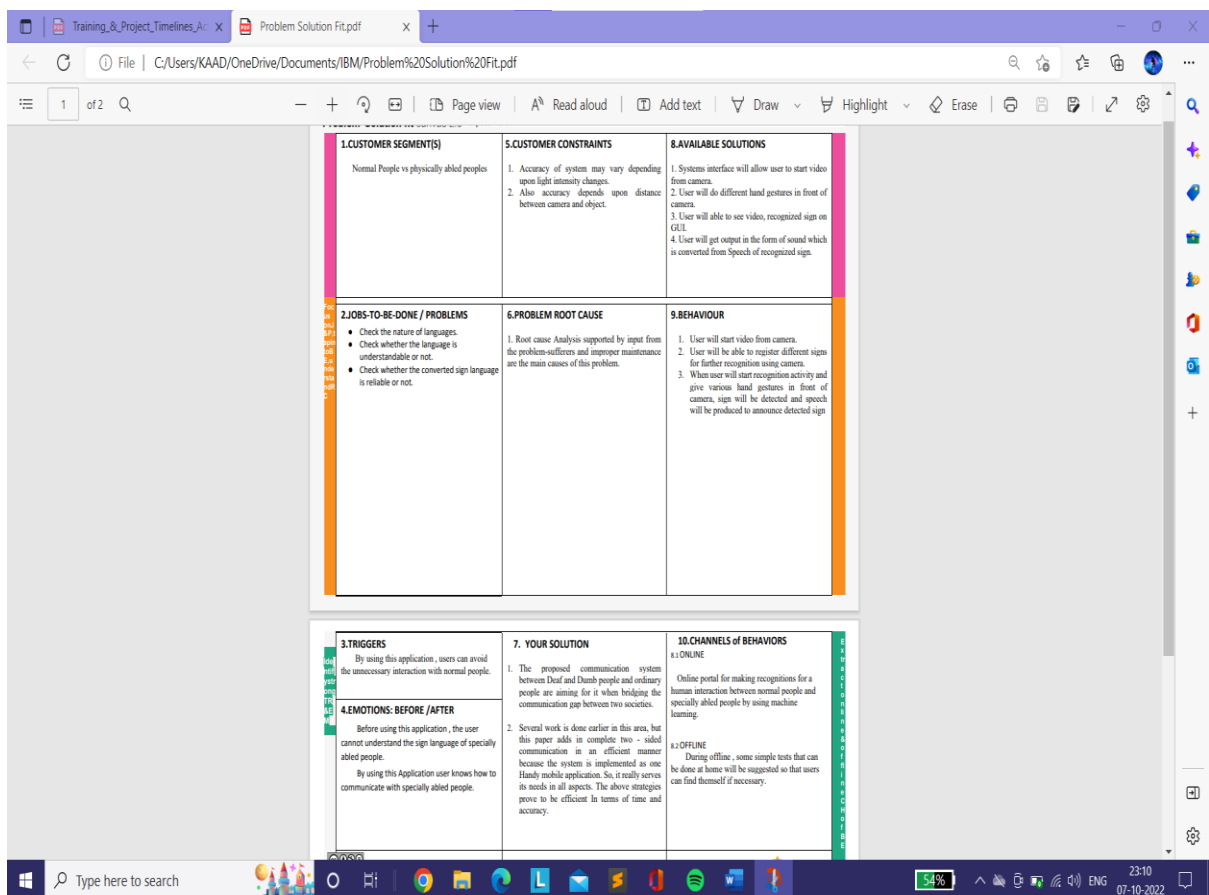

Problem – Solution Fit Template & Solution Architecture

Problem-solution fit is a term used to describe the point validating that the base problem resulting in a business idea really exists and the proposed solution actually solves that problem.

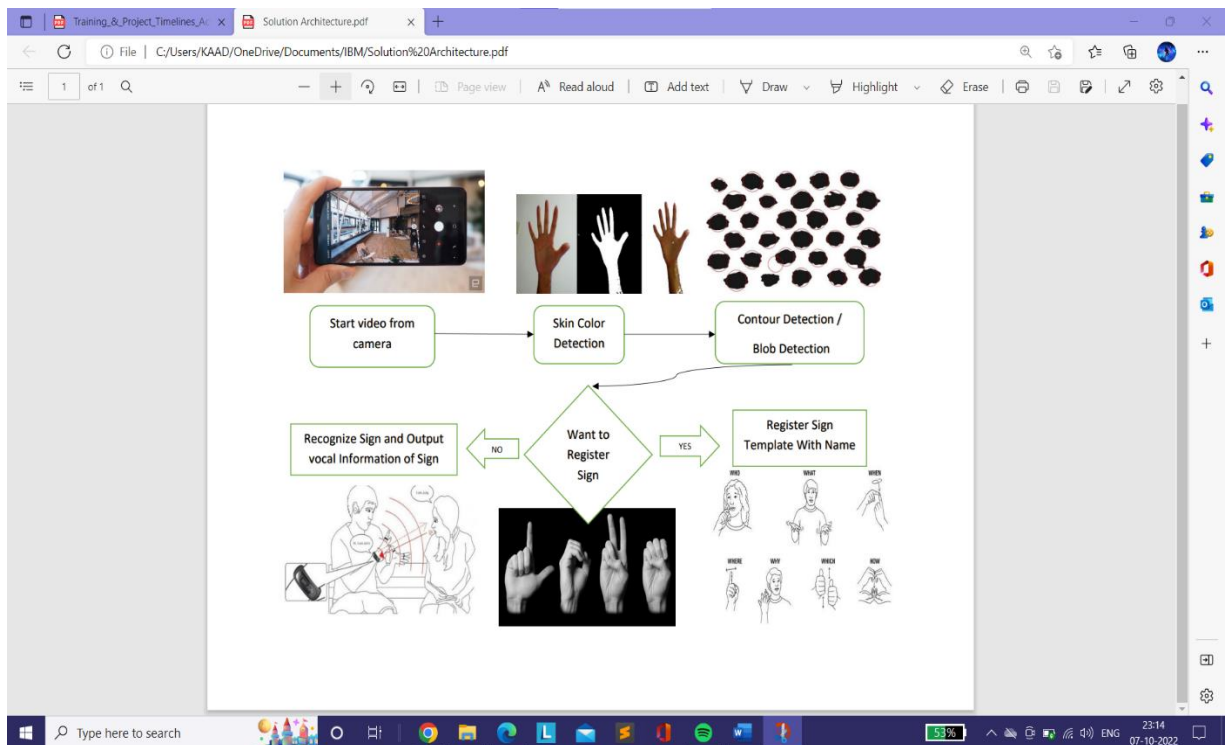

The solution architecture helps ensure that a new system will fit the existing enterprise environment. To perform this task, a solution architect has to understand how all parts of the business model work together including processes, operating systems, and application architectures.

Completion status :

Submitted the Problem Solution fit Template in GitHub.

Submitted the Solution Architecture in GitHub.

Activity – 3.4

Attended the training sessions .

Completed Quiz 3 and Submitted Assignment 3
