

NAALAIYA THIRAN - Real-Time Communication System

Powered by AI for Specially Abled

WEEK – II REPORT

Activity 2.1 – Literature survey on the selected project and Information gathering

We know literature surveys give rise to the work and projects we do. And we appreciate that we got this activity to do, so that we could get some ideas and acquire knowledge regarding our project.

We made a literature survey for our project “**Real-Time Communication System Powered by AI for Specially Abled**”. We got to know a lot, and got some ideas how others have their things done. And also referred to the IEEE papers available on this project, and made a detailed literature survey report on that.

Activity 2.2 – Attend the technology trainings as per the training calendar , Attend the training and practice exercises provided.

We had 2 sessions, where we attended both the training sessions efficiently.

The first session was held on 02-09-2022. The lecturer gave a good lesson on some basics in Artificial Intelligence, Machine Learning, Deep Learning and Needs of Data Science.

The second session was held on 07-09-2022. The lecturer gave a good lesson on some basis in python like lists, tuples and dictionaries in the first half, and also made us work on it. In the second half we were taught by conditions and looping statements.
